

## ENVIRONMENTAL POLICY

**Our business philosophy is to manufacture products according to customer requirements while paying attention to environmental protection. Aware of our context, we pursue this by implementing and continuously improving an environmental management system for digital sublimation and latex printing.**

We achieve our mission by:

- continuously identifying stakeholder requirements and requirements arising from the context of the organisation,
- meeting the compliance requirements for our business,
- improving manufacturing technologies and processes so that they are environmentally friendly,
- continuously improving the skills and environmental awareness of our employees,
- cooperating with carefully selected suppliers,
- promoting green offers,
- preventing pollution and protecting the environment during process implementation.

At Flagowa Kraina Sp. z o.o., we respect national and EU legislation and implement procedures and methods of conduct that are necessary for consistent management that is compliant with environmental protection principles.

The Board and Management ensure that the environmental management system policy is known to all employees and made available to stakeholders.

The Management declares to supervise the execution and improvement of the implemented management system and the adopted policy and undertakes to provide adequate resources and means necessary to implement its provisions.
